

AP Environmental Science Summer Assignment

AP Environmental Science (APES) students will be required to read chapters 1 and 2 of Miller Living in the Environment 14th ed., outline and reflect on what they've read, and answer Critical Thinking questions from the book (available at <http://arundelhigh.org> then click on Summer Assignments 2010, APES Textbook).

If you are unable to get a hard copy of this assignment from me, it is available at Arundel's website under Summer Assignment! Please IGNORE the 2nd page of the Textbook pdf file entitled, "Soil Sampling." You are only working from the book. You will find the chapters to be Read and Outlined, and the Critical Thinking questions (end of each chapter) in the pdf file.

Enjoy your summer.
